GOALS

Dear HR Team,

I am **Vuong Ngoc Gia Bao**, 22 years old, currently a student at Aptech (Dec 2024 intake). Transitioning from a professional chef background, I bring a practical and disciplined mindset to programming, with a strong focus on precision and process.

Having completed my first year, I identify as a **Next-Gen Coder**. My strength lies in analyzing application flows and designing logical architectures. I prioritize architecting smart solutions and leveraging AI as a powerful execution tool to optimize performance and delivery time. I believe that in this new era, the ability to master workflows and orchestrate technology is the core driver of value.
